

FACIAL REJUVENATION DUBAI

How do you know whether facial rejuvenation is right for you? Take the mirror test. Stand in front of a mirror in a well-lit room and truly look at all your features. Ask yourself what bothers you and what would you like to change.

Are your brows or eyelids droopy? Are your cheeks hollow or sagging? Do you have jowls? Is your neck full or is it sagging? Are there other marks or lines on your face you don't like? Are your earlobes and nose getting longer and droopy? Are your lips deflated or getting longer? Do you have wrinkles on your lips and laugh lines around your eyes?

TOP 5: MINIMALLY INVASIVE PROCEDURES UNDERTAKEN IN 2018

REASONS FOR FACIAL REJUVENATION

When selecting a provider for injectable treatments, give your decision the same level of care and scrutiny that you would for a surgical procedure. Non-surgical filler treatment is still a medical procedure that requires specific training, knowledge and skill to ensure safe treatment and natural-looking results.

WHICH INJECTABLE IS RIGHT FOR YOU?

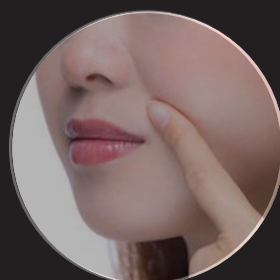

GOT WRINKLES AND FINE LINES?

You'll probably see best results with botulinum toxin. This neurotoxin is a great solution for candidates who have fine lines and wrinkles caused by muscle movement. Botox is FDA approved to treat areas across the forehead and between the eyebrows as plus the wrinkles around the eye known as crow's feet.

WANT FULLER CHEEKS?

Naturally youthful faces have volume in the mid-facial region, including the cheeks. Over time, age-related volume loss can cause the cheeks to flatten and the skin to sag. Juvederm Voluma XC is designed to add volume to lift and contour the cheek area. Results can last anywhere from 1 - 2 years.

SUFFERING FROM FOLDS?

Candidates with nasolabial folds - those moderate to severe lines between the nose and the corners of the mouth - may see their best results from Juvederm Vollure and/or Juvederm Ultra Plus injections. This FDA-approved injectable fills in the folds and gives you natural-looking results that last 9-12 months.
