RENUVA TREATMENT
FOR AGE-DEFYING
VOLUME RESTORATION &
CONTOURING

Renuva is ideal for restoring lost volume and smoothing irregularities in various areas of the body. If you seek natural-looking results without surgery and minimal downtime, Renuva may be the perfect solution for you.

Renuva works by utilizing processed adipose tissue, which is extracted from your own body fat, to restore lost volume and contour irregularities. This processed tissue is injected into targeted areas, where it integrates with existing fat cells, providing long-lasting results.

WHERE CAN RENUVA BE USED?

FACE

Renuva restores lost volume in the cheeks, temples, nasolabial folds and other areas of the face, leaving you with age-defying, lasting results.

NECK & CHEST

Renuva helps smooth and tighten neck skin. The treatment also replaces age-related fat loss on the décolletage, erasing vertical lines and smoothing the skin.

HANDS

Renuva replenishes age-related fat loss in the hands, reducing the appearance of veins, bones and loose skin.

BODY

Renuva can be used anywhere fat naturally exists in the body to volumize hip-dips, erase cellulite dimples, smooth liposuction irregularities, flatten depressed scars, and more.

CONTOURING

Renuva is ideal for contouring body areas that don't respond to exercise - like small contour deficiencies in the buttocks and indentations on the sides of the body, called hip dips.

BREAST

Renuva can be used to camouflage breast implant irregularities, like rippling, squaring off, or indentations without the need for liposuction or surgery.

HOW RENUVA® WORKS

Renuva® is an adipose allograft matrix composed of collagen, proteins, and growth factors derived from donated and purified fat. Think of it as a scaffolding that triggers your body's fat production. After it's injected, your stem cells divide and grow into new fat cells that populate the new collagen matrix that it creates - in other words, the solution gets replaced over time with your own fat.

In addition to resulting in less post-injection swelling, the technology purportedly eliminates that uncanny effect that can happen when filler sits awkwardly on top of moving facial muscles.

The new volume is living cells in the anatomical layer it belongs in. Because of that it will look and animate naturally. What's more, those new fat cells can live for at least 10 years, if not longer.

In line with injectables like Ellansé®, Radiesse®, and Sculptra® (all of which trigger the body to boost its collagen production), Renuva® is one more piece of an industry-wide shift. The thinking behind these treatments is to enhance the body's own reparative abilities. It overlaps with general healing as well as anti-aging and longevity - essentially the doorway to the fountain of youth.

Similar to the recent positioning of certain neurotoxins and fillers as 'clean' or 'pure' injectables, Dr. Vigo sees patient desire driving this turn. People are wanting 'regenerative' procedures that stimulate your own body to improve over time. They like the idea of more 'natural' and less 'synthetic' injectables.

WHAT RENUVA® IS BEST FOR

The treatment works in areas of the face that naturally have fat cells, including the temples, nasolabial folds, chin, jawline, and cheeks. It can also be used on the hands. And that's not all. It's great to use post-surgical on patients with small indentations or irregularities on the body, like in the breasts or in cellulite, and those with botched liposuction procedures. It's important to note that Renuva® is not your best option if speed is your priority.

HOW LONG DO RENUVA IMPROVEMENTS LAST?

Renuva results are long-lasting because the processed adipose tissue integrates with your body's own fat cells. While individual experiences may vary, most patients enjoy results that can last for several years.

WHAT IS THE DOWNTIME FOR RENUVA?

As with any injectable treatment, there may be some sensitivity, discomfort, or redness in the treatment area, but there is minimal downtime following the procedure. Although swelling may persist for up to 2 weeks after injection, patients can resume everyday activities immediately following the treatment.

AM I A GOOD CANDIDATE FOR RENUVA ADIPOSE MATRIX?

Good candidates for Renuva treatment are individuals seeking to restore lost volume, smooth irregularities, and enhance contours without surgery. Ideal candidates are in good overall health and have realistic expectations about the results.

Renuva is a safe and effective non-surgical treatment that can be used to restore volume loss in the face, hands, and body. It offers long-lasting, natural-looking results with minimal downtime. If you are looking for a way to improve your appearance without surgery, Renuva may be a good option for you.

A BRIEF NOTE FROM
DR. MATTEO VIGO

I decided to become a doctor at early age but I was not aware of the world of Plastic Surgery. Once I have discovered it I fell in love with the whole concept behind and how this field of Medicine can be helpful for many people.

I passionately believe that, in order to improve the physical aspect of a patient, the plastic surgeon needs to combine the principles of art and science, adopting a global approach to understanding the individual desires.

Plastic Surgery is a truly fascinating, dynamic, constantly evolving field of medicine and I believe that the role of a Cosmetic Surgeon is unique and highly privileged.

My main goal is to understand the needs of a patient and try to transform their desires into reality. The role of a plastic surgeon is not only merely surgical but also supportive in the decision process of the best treatment to help patients finding themselves and their wellbeing.

All these steps are taken into consideration once a person walks in my office and the service I am offering them is always at the top.

I am combining experience, quality and professionalism to evaluate each single case and offer the best solution for my patients.

“Because you deserve the best” is my motto and I want always to put the patient at the centre of what I am doing.

You have to feel pampered, understood, listened, loved once in my office and the feedback of this feelings from my patient is my best satisfaction.
