

PATIENT JOURNEY

BILATERAL OTOPLASTY

GENDER

Male

AGE

43 years old

OPERATION DURATION

Two hours

POST OP CONSULTATIONS

Week 1, Week 2, Month 1

CLINIC

Amwaj Polyclinic

JOURNEY

The patient had some complaints about his ears shape and wanted to obtain a natural look in order to be able to shave his hair on the side without being bothered by the appearance of the prominent ears.

TREATMENT

The patient underwent Bilateral Otoplasty. A plication of the cartilage was performed together with skin removal. Permanent stitches will ensure a long lasting effect.

RECOVERY & FOLLOW-UP

The patient was discharged a few hours after the surgery and was able to resume normal activities in a couple of days.

RESULTS

The picture above is post 3 weeks of the surgery. The patient loved the results.

“I couldn’t be happier with the outcome of my otoplasty surgery.”
