CLINIC

AIG Clinic

JOURNEY

The patient wanted to tighten the loose skin.

TREATMENT

The patient underwent J-Plasma Renuvion skin tightening for the double chin.

J-Plasma Renuvion is a revolutionary minimally invasive procedure that uses cold plasma energy

on the underside of the skin to instantly tighten and rejuvenate anywhere on the face and body. A unique alternative to traditional facelifts, the J-Plasma Renuvion procedure will shrink and sculpt loose and lax skin without large incisions, downtime or complications of cosmetic surgery.

RECOVERY & FOLLOW-UP

The patient had to wear a garment for a couple of weeks to heal and maintain the good results came out after the procedure. She experienced some swelling for brief period but she was recovered faster than expected.

RESULTS

The pictures above are post 4 months of the surgery. The patient loved the results and she was doing Lymphatic Massage as advised by the doctor which helped her with the swelling.

“I am stunned by the results! I have never liked my profile very much and have avoided being photographed from the side, but not anymore!”
