

# PRP TREATMENTS

Platelet Rich Plasma (PRP) is a revolutionary therapeutic approach in regenerative medicine that has recently gained increased prominence in the cosmetic and plastic surgery realm.

Cosmetic regenerative PRP therapy provides growth factors from your own blood to optimize your wound healing and is used for several non-surgical cosmetic skin treatments to enhance the results.

PRP treatments are a good way to maintain a youthful glow throughout the year without having to undergo surgery. Patients have an endless supply of blood, so the treatment is always readily available and is extremely rejuvenating.

## PATIENT RESULTS WITH PRP TREATMENTS

PATIENTS SAW AN **IMPROVEMENT** IN TEXTURE AND TONE

PATIENTS SAW AN **IMPROVEMENT** IN SKIN NATURAL PLUMPNESS AND VITALITY

PATIENTS SAW A **REDUCTION** IN THE APPEARANCE OF SUN DAMAGE

## TOP APPLICATIONS

### WHY PRP TREATMENTS ARE USED...

## PLATELET RICH PLASMA TREATMENT...

IS A **SAFE**, EFFECTIVE AND NON-SURGICAL TREATMENT

STIMULATES THE BODY'S **NATURAL** HEALING PROCESS

IS A **PROVEN** TREATMENT TO REJUVENATE YOUR SKIN

Treatment with PRP can be completed in less than 30 minutes. When the patient arrives, a small vial of blood is drawn, similar to the volume required for routine blood work. The blood is then spin in a centrifuge to separate the growth factors, and platelets from the rest of the blood. Once this unique mixture is obtained, it can be injected directly into the targeted areas or applied through micro needling.

To achieve the best results, most patients have three treatments, spaced at 4 to 8 week intervals. During the first month, a noticeable improvement in skin texture can be seen. Maximum collagen regeneration occurs around 3 months after the initial treatment, resulting in in plumper, lifted skin with fewer lines and wrinkles.
