

# PATIENT JOURNEY

## LIPOSUCTION BY SYNETICA & J-PLASMA NECK

### GENDER

Male

### AGE

42 years old

### OPERATION DURATION

40 minutes

### POST OP CONSULTATIONS

2 days, 5 days, 1 month

### CLINIC

Valiant Clinic

### JOURNEY

The patient came requesting the improvement of his double chin and lower face.

### TREATMENT

The patient underwent Liposuction by SYNETICA and J-Plasma Neck.

SYNETICA is a powerful tool to have the best result with a liposuction. Ultrasound and radiofrequency assisted suction in one machine to gently melt the fat and tighten the skin.

J-Plasma body contouring and skin tightening is an innovative minimally invasive treatment that tightens as well as contours saggy skin in almost any area of the body. It can offer particularly desirable results as a non-surgical neck lift procedure.

### RESULTS

As you can see in the pictures, there is a huge difference in the neck area after the mentioned surgery and the patient is extremely pleased with the results after a couple of follow ups. The underchin in a man is always a challenging area to treat due to the present of submuscular fat pads which are not possible to be removed with such treatment.

*"I had treatment done to my lower jawline and neck by Dr. Vigo. He is amazing, a true artist and the staff were so lovely and put you at ease"*
