NON-SURGICAL RHINOPLASTY

GENDER

Female

AGE

28 years old

OPERATION DURATION

30 minutes

POST OP CONSULTATIONS

Immediate result

CLINIC

Amwaj Polyclinic

JOURNEY

The patient wanted to have non-surgical Rhinoplasty through fillers.

TREATMENT

The patient underwent Nose Filler. A non-surgical nose job (also known as non-surgical rhinoplasty or nose filler) can be an ideal solution if you are unhappy with the shape of your nose and do not want to undergo invasive surgery. A new look can be created with Dermal Fillers to subtly and effectively change the shape of the nose by injecting filler into the nose, improving the overall appearance. If you have a bump on the bridge of the nose, filler is injected above and below the bump to make the nose look straighter and the bump less noticeable.

RECOVERY & FOLLOW UPS

The patient had no bruises or redness post treatment.

RESULTS

As you can see in the pictures, there was an immediate result post the treatment which the patient really loved.

"I just wanted to let you know I'm doing well and I'm very happy with how my nose looks. You've done an incredible job!"
