MIA FEMTECH™
FREQUENTLY ASKED
QUESTIONS

Mia Femtech™ is the first ever injectable, biocompatible implants for 1 to 2 cups up, designed for a true natural look & feel.

Here are some answers to frequently asked questions about Mia Femtech™

DOES MIA FEMTECH™ USE IMPLANTS?

Indeed, implants used during the Mia® Experience stand out from any other on the market. With an innovative technology, those implants are made of silicone and have a diamond shape to achieve maximum projection with minimal volume. Mia® Experience allows you to harmonize your breast by increasing one to two cup sizes.

HOW DOES MIA FEMTECH™ WORK?

The breakthrough minimally invasive 15 minute procedure applies a proprietary high tech and patented system with a preservative tissue technique so you can get on with your busy life on the same day.

Mia Femtech™ brings harmony to your body with a naturally discreet result by shaping your breasts in 15 minutes using breakthrough minimally invasive technology with no general anesthesia so that you can get on with your busy life on the same day.

- Breast harmonization for one to two cups up with natural results
- Resume your busy life on the same day of your procedure
- Exclusive high-tech system for a patented minimally invasive procedure
- A 15-minute procedure without general anesthesia
- Breast tissue preservation technique with small, concealed scars

IS THE 15 MINUTES SUFFICIENT?

The 15 minutes refer to the skin-to-skin procedure; less time spent on the procedure means fewer associated risks. This timeframe can be achieved thanks to the minimally invasive technique, the innovation and

the expertise of our top surgeons. In total, the procedure will take about a comfortable 90 minutes, and you will be in recovery with Business-class comfort.

WHAT ARE SOME OF THE MIA FEMTECH™ BENEFITS?

Mia Femtech™ is a naturally discrete procedure that offers you proportional results and so much more! Here are some of the outlined benefits you can look forward to:

- True to your essence: You can expect a naturally discrete result proportionately to your body.¹ Only you decide who will know.
- A body-caring procedure using a breast-tissue preservation technique. You can expect low post-operative pain¹ and a small, concealed scar in the axilla.
- Quick recovery: You can resume your busy life on the same day with minimal downtime¹ thanks to the breast-tissue preservation technique and no general anesthesia.
- A one-of-a-kind personalized experience: A dedicated Mia® Concierge will assist you throughout your journey at the clinic, which may take around 90 minutes. In addition, a Pampering Kit is provided to take care of you, and a dedicated consumer-care channel is available for your needs.
- The procedure is performed in 15 minutes or less¹ (total Mia® procedure).
- Local anesthesia and conscious sedation, with significantly fewer risks than those associated with general anesthesia.
- Patented technologies: An exclusive, high-tech system with 13 patent families and more than 130 applications worldwide.
- Mia® NFT comprehensive coverage: At the clinic, your experience may be registered to access a full-warranty program ; additional support is provided for your peace of mind if you decide to reverse your procedure.

HOW TO PREPARE FOR A MIA FEMTECH™PROCEDURE?

In preparation for your Mia® procedure, please take into consideration the following:

- Show up to your procedure day with shaved axillae (armpits)
- Do not eat food for at least 6 hours before your procedure

- Do not drink clear liquids for at least 2 hours before your procedure (water, pulp-free juice, tea, or coffee)
- Do not wear any deodorant to your procedure
- Do not wear any make-up to your procedure
- Do not wear any perfume to your procedure
- Do not wear any cream or body lotion to your procedure
- Please consult with your health care professional for any further medical recommendations

HOW DOES THE MIA® EXPERIENCE DIFFER FROM TRADITIONAL BREAST AUGMENTATION?

The innovation of the Mia® Experience offers unique advantages over traditional breast augmentation. With the Mia® technique, the surgeon does not use a scalpel on the breast; instead, a patented high-tech device creates a channel to the breast and injects the prosthesis, preserving the tissue.

IS THE MIA® EXPERIENCE RIGHT FOR ME?

You are a good candidate for the Mia® technique if you identify with one or more of these statements:

- You are seeking harmonization of the breast with discreet (maximum 195 cc) and proportional results in relation to your body.
- You are tired of using padded bras or tricks to achieve a more beautiful cleavage.
- You feel self-conscious about the appearance of your breast due to breastfeeding, aging, or changes in your body, and you want to regain confidence.
- You would like to have developed breast in harmony with your body.
- You seek natural, discreet, and proportionate results.
- You prefer a minimally invasive solution without general anesthesia and with minimal recovery time.
- You have a busy schedule and want a quick procedure that can easily adapt to your lifestyle.
- You need to resume your activities on the same day or the next day.

A BRIEF NOTE FROM
DR. MATTEO VIGO

I decided to become a doctor at early age but I was not aware of the world of Plastic Surgery. Once I have discovered it I fell in love with the whole concept behind and how this field of Medicine can be helpful for many people.

I passionately believe that, in order to improve the physical aspect of a patient, the plastic surgeon needs to combine the principles of art and science, adopting a global approach to understanding the individual desires.

Plastic Surgery is a truly fascinating, dynamic, constantly evolving field of medicine and I believe that the role of a Cosmetic Surgeon is unique and highly privileged.

My main goal is to understand the needs of a patient and try to transform their desires into reality. The role of a plastic surgeon is not only merely surgical but also supportive in the decision process of the best treatment to help patients finding themselves and their wellbeing.

All these steps are taken into consideration once a person walks in my office and the service I am offering them is always at the top.

I am combining experience, quality and professionalism to evaluate each single case and offer the best solution for my patients.

“Because you deserve the best” is my motto and I want always to put the patient at the centre of what I am doing.

You have to feel pampered, understood, listened, loved once in my office and the feedback of this feelings from my patient is my best satisfaction.

Dr Matteo Vigo

Often regarded as the Best Plastic Surgeon in Dubai, Dr. Matteo Vigo graduated in Milan in 2004 and started his residency period in the Plastic Surgery and Burn Unit in Verona in 2005.

He worked in the Breast Unit where he developed his skills in breast reconstructive and aesthetic surgery together with the full spectrum of plastic surgery procedure.
