**PRESERVÉ™:**  
A NEW ERA OF BREAST  
AUGMENTATION

Preservé™ is a new technique to breast augmentation that prioritizes preserving natural breast tissue, structure, and sensation. Preservé™ is a significant advancement in modern breast surgery, offering women a more harmonious look with little invasive procedures.

### **What is Preservé™?**

Preservé™ is an innovative surgical technique that uses specialised tools and the next-generation Motiva SmoothSilk® Ergonomix2® implants to reshape the breast while conserving its intrinsic architecture.

By avoiding disruption to key tissues, this approach offers:

- Smaller incisions and reduced scarring
- Faster recovery and lower inflammation
- Long-lasting softness and natural feel
- Preservation of breast function and stability

### **How It Works?**

Preservé™ relies on a suite of advanced tools developed by Establishment Labs®:

- Motiva® Inflatable Balloon – gently elongates tissues to form a precise pocket
- Channel Separator – guides placement and protects natural structures
- Insertion Sleeve – enables a no-touch implant insertion
- Marking Tool & Selection Set – ensures precise sizing and positioning

Each component works together to minimise tissue damage and promote optimal healing.

## Who is it for?

Preservé™ is ideal for women considering:

- Primary Breast Augmentation
- Mastopexy Augmentation
- Hybrid Augmentation

It's the preferred choice for patients who value long-term outcomes, a natural look and feel, and a gentler approach to breast enhancement. Whether you're new to breast surgery or upgrading from a previous implant, Preservé™ offers a refined, personalised experience.

## Benefits of preservé™

### • Preserve breast anatomy

Preservé™ is an innovative, less invasive breast augmentation surgery, preserving the patient's native breast tissues and sensation over time.

### • Preserve breast softness

Preservé™ is a less invasive\* breast procedure that reduces disruption to the natural breast tissue support structures. Combining the low-inflammatory SmoothSilk®

Ergonomix2® implant with the proprietary Preservé™ system, patients will benefit from smaller scars and low device- and technique-related complications while conserving their native breast tissues for a quick recovery.

### • Preserve breast stability

A less invasive\* breast tissue preservation technique avoids disruption to the pectoralis major muscle and minimizes the damage to the natural breast structures. It elongates the native tissues to create a nest for the breast implant support, as evidenced by a clinical study which reported a 0% rate of inferior malposition at three years.

### • Preserve peace of mind

By combining the Motiva Smooth Silk® surface with Preservé™, this approach is designed to reduce tissue damage and create a low inflammatory response. It is backed by clinical evidence of no chronic inflammatory proliferative diseases (like BIA-ALCL). The Preservé™ warranty offers patient support in the event of a device-related complication or an undesired outcome.

## Ready to try Preservé™?

Schedule a consultation with Dr. Matteo Vigo to explore how this revolutionary technique can be customized to your specific goals and anatomy.

**VIGO**  
PLASTIC SURGERY

# A BRIEF NOTE FROM DR MATTEO VIGO

I decided to become a doctor at early age but I was not aware of the world of Plastic Surgery. Once I have discovered it I fell in love with the whole concept behind and how this field of Medicine can be helpful for many people.

I passionately believe that, in order to improve the physical aspect of a patient, the plastic surgeon needs to combine the principles of art and science, adopting a global approach to understanding the individual desires.

Plastic Surgery is a truly fascinating, dynamic, constantly evolving field of medicine and I believe that the role of a Cosmetic Surgeon is unique and highly privileged.

My main goal is to understand the needs of a patient and try to transform their desires into reality. The role of a plastic surgeon is not only merely surgical but also supportive in the decision process of the best treatment to help patients finding themselves and their wellbeing.

All these steps are taken into consideration once a person walks in my office and the service I am offering them is always at the top.

I am combining experience, quality and professionalism to evaluate each single case and offer the best solution for my patients.

"Because you deserve the best" is my motto and I want always to put the patient at the centre of what I am doing.

You have to feel pampered, understood, listened, loved once in my office and the feedback of this feelings from my patient is my best satisfaction.
