REJURAN INJECTIONS FOR
FRESH, HEALTHY SKIN

If you're looking for a way to improve your skin's texture, elasticity, and overall radiance without changing how you look, Rejuran might be what you've been waiting for. Known as the "skin healer," Rejuran is a cutting-edge injectable treatment that helps repair and rejuvenate your skin from the inside out.

What is Rejuran?

Rejuran is a skin-repairing injectable made from polynucleotides (PNs), the building blocks of DNA, extracted from salmon. Yes, salmon. Why? Because their DNA is highly compatible with human skin, making it a powerful tool to boost regeneration, reduce inflammation, and restore a smoother, firmer texture.

It's not a filler and it's not Botox. Rejuran doesn't change your facial structure or freeze your expressions. Instead, it works at a cellular level to improve skin quality over time.

What can Rejuran treat?

Rejuran is ideal if you're noticing:

- Fine lines and crepey skin
- Enlarged pores
- Acne scars
- Dull or tired-looking skin
- Skin thinning from ageing or sun damage

We typically treat the face, neck, under-eye area, and hands, anywhere your skin could benefit from healing and renewal.

How does Rejuran work beneath the surface?

Unlike treatments that focus only on the top layer of skin, Rejuran goes deeper, targeting the foundation of skin health, your cells.

The key ingredient in Rejuran is polynucleotide (PN), a purified fragment of DNA derived from salmon. These molecules are biocompatible and have remarkable healing properties. Once injected just beneath the surface of the skin, they start to work in several ways:

- **Cell regeneration:** Rejuran activates fibroblasts, the cells responsible for producing collagen and elastin. This kickstarts your skin's natural repair process, improving structure and firmness over time.
- **Anti-inflammatory action:** Rejuran calms irritated skin and reduces micro-inflammation, which contributes to aging and skin damage. Many patients notice a clearer, calmer complexion within days.
- **Hydration boost:** As skin heals and strengthens, its ability to retain moisture improves. This translates into that healthy, radiant glow that so many patients notice after their treatment.
- **Skin barrier repair:** Rejuran strengthens the outermost layer of your skin, improving resistance to environmental stress and pollutants.

Think of it as **a reboot for your skin**, restoring balance, strength, and smoothness without altering your facial features or expressions.

Is there any downtime?

Very minimal. You may experience slight redness or tiny bumps at the injection points, similar to mosquito bites. These usually settle within 24–48 hours. Most of our patients return to their usual activities right after the session.

A BRIEF NOTE FROM DR MATTEO VIGO

I decided to become a doctor at early age but I was not aware of the world of Plastic Surgery. Once I have discovered it I fell in love with the whole concept behind and how this field of Medicine can be helpful for many people.

I passionately believe that, in order to improve the physical aspect of a patient, the plastic surgeon needs to combine the principles of art and science, adopting a global approach to understanding the individual desires.

Plastic Surgery is a truly fascinating, dynamic, constantly evolving field of medicine and I believe that the role of a Cosmetic Surgeon is unique and highly privileged.

My main goal is to understand the needs of a patient and try to transform their desires into reality. The role of a plastic surgeon is not only merely surgical but also supportive in the decision process of the best treatment to help patients finding themselves and their wellbeing.

All these steps are taken into consideration once a person walks in my office and the service I am offering them is always at the top.

I am combining experience, quality and professionalism to evaluate each single case and offer the best solution for my patients.

"Because you deserve the best" is my motto and I want always to put the patient at the centre of what I am doing.

You have to feel pampered, understood, listened, loved once in my office and the feedback of this feelings from my patient is my best satisfaction.
